Collocations in a Learner Corpus Nadja Nesselhauf,2005-01-27 Collocations are both pervasive in language and difficult for language learners, even at an advanced level. In this book, these difficulties are for the first time comprehensively investigated. On the basis of a learner corpus, idiosyncratic collocation use by learners is uncovered, the building material of learner collocations examined, and the factors that contribute to the difficulty of certain groups of collocations identified. An extensive discussion of the implications of the results for the foreign language classroom is also presented, and the contentious issue of the relation of corpus linguistic research and language teaching is thus extended to learner corpus analysis.

Language Processing in Advanced Learners of English Marco Schilk,2020-05-15 The production and processing of collocations and formulaic language is a field of growing interest in corpus linguistics and experimental psycholinguistics. In

the past this fascinating field at the interface of grammar and the lexicon has been mainly studied based on English native speakers, while research focusing on second language speakers and language learners has been comparatively rare. This book proposes an integration of corpus-based and experimental methods by analysing language processing of collocation by advanced learners of English. In using corpus-derived collocational stimuli of native-like and learner-typical language use in an experimental setting, it shows how advanced German L1 learners of English process native-like collocations, L1-based interferences and non-collocating lexical combinations. This book is of interest to anyone interested in the psycholinguistic validity of collocation from a bilingual point of view, as it explores methods of tracking collocational processing of speakers working with different sets of 'collocational preferences'.

Wortverbindungen - mehr oder weniger fest Kathrin Steyer, 2019-01-29 Im Band werden aktuelle Probleme und Tendenzen der Mehrwortforschung aus unterschiedlichen theoretischen und methodischen Blickwinkeln betrachtet, so wie sie sich z.B. aus der Phraseologie und Parömiologie, aus der Kollokationsforschung, aus Lexikologie und Lexikografie, Lexikontheorie, Grammatik und Pragmatik sowie aus der Computer- und Korpuslinguistik ergeben.
